

Spring Flowers Extra ~

Order and Numbers

Through a Series of Flowers in Blossom

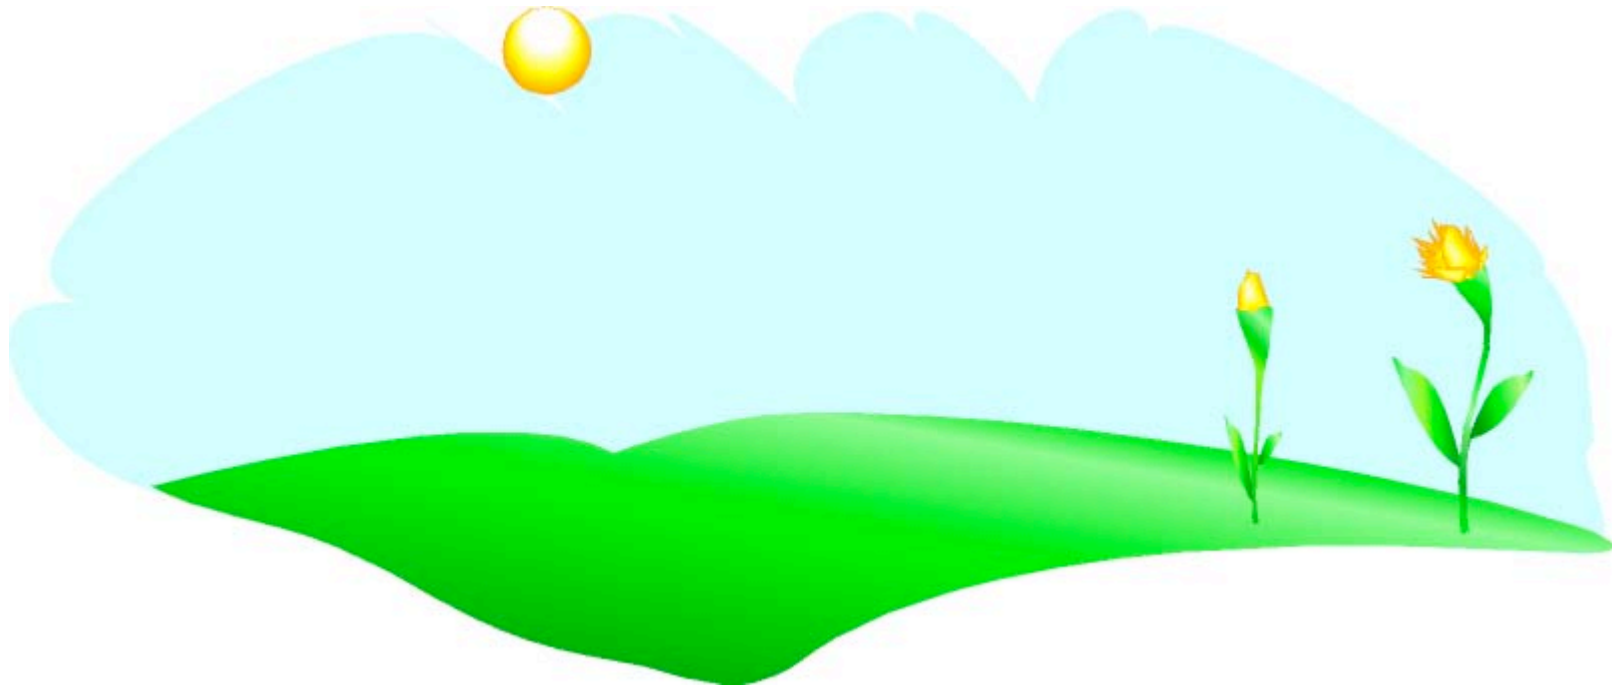

One spring day in the month of April

1 small flower was out.

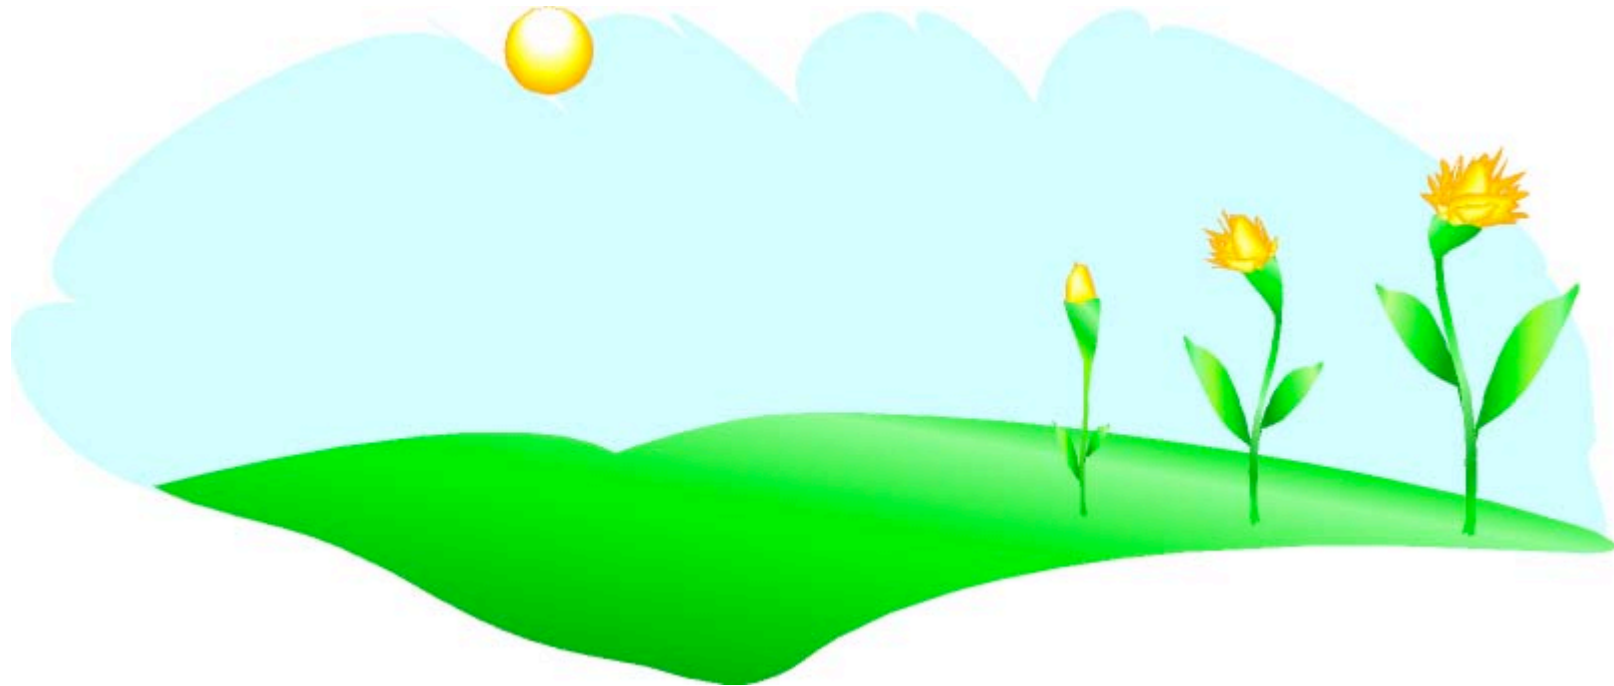

On the next day the same flower was out
but seen a little bigger.

Yet, another small flower sat next to it ~ 2.

The day after, the same 2 flowers were out.
But, both were seen a little bigger.

Yet, another small flower sat next to them ~ 3.

The day after that day, the same 3 flowers were out. But, all were seen a little bigger.

Yet, another small flower sat next to them ~ 4.

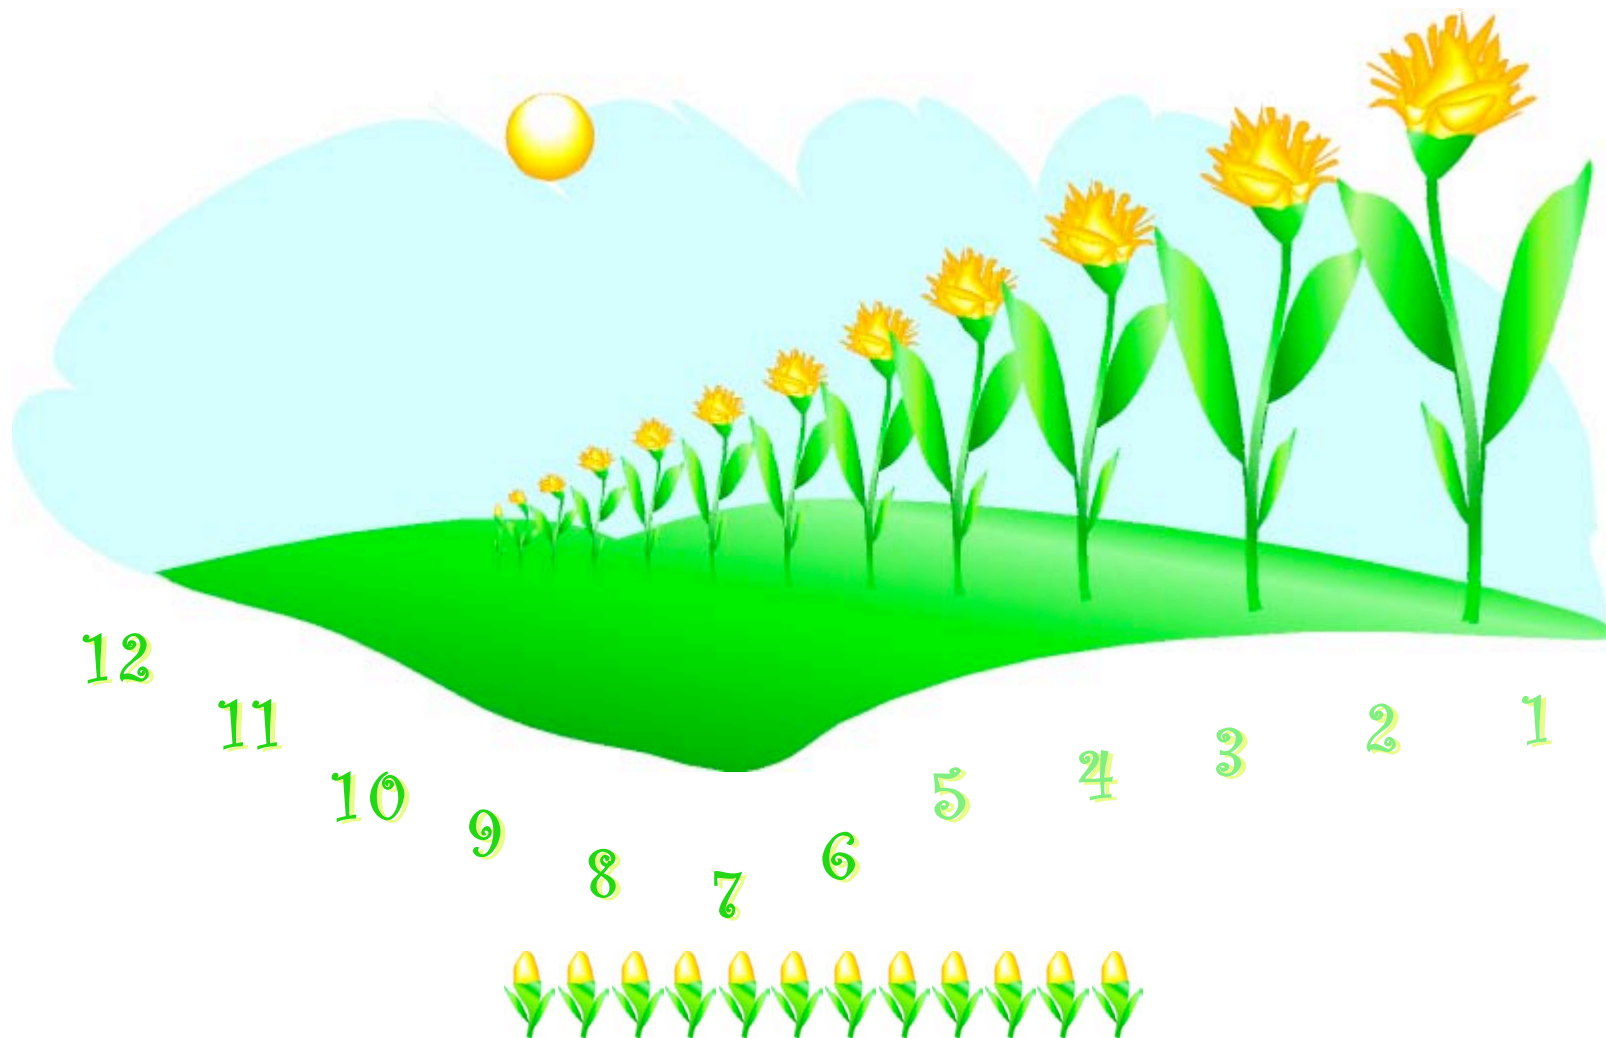

Day by day, an added small flower was seen ~ 5.

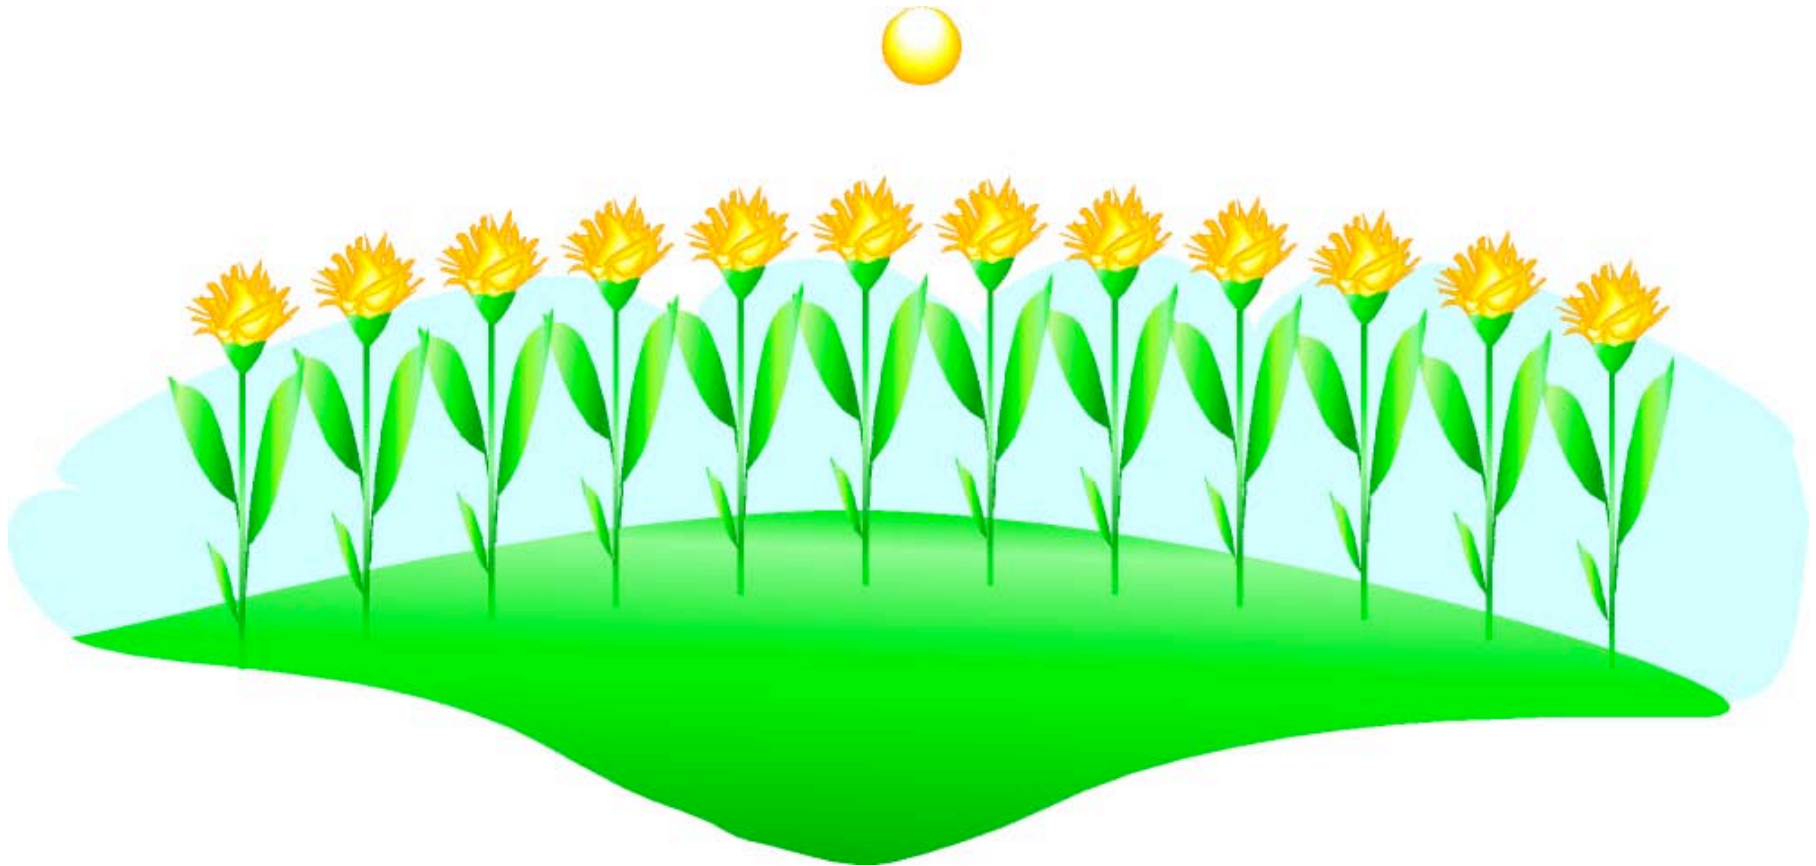

And, all other flowers were seen a little bigger.

Day by day ~

Then ~ one spring day in the month of May
12 huge flowers stood high and free.

What is more ~
on that day all who passed saw them all.
